VINDICATING THE NAME OF NEVADA

W ALTER C. Lamb, editor of the Tonopah Miner, has announced himself a candidate for the United States senate in opposition to E. E. Roberts, congressional representative from this state. The decision was reached only after much deliberation and the manly statement of the candidate which appears in today's Bonanza is certain of winning the confidence and support of every Republican elector.

In Tonopah there is not much use expatiating on the many sterling qualities of Mr. Lamb whose interests for many years have been centered in this district and throughout southern Nevada. While the candidate hails from Washoe county and he will make the campaign as a resident of Reno, he has the advantage of a close personal acquaintance with every one who has ever done business in this section. The resolution of Mr. Lamb to come for ward as the candidate of his party at the primaries was reached after long and earnest counselling with his friends who urged him to come forward as the logical representative of the loyal citizens of Nevada. His declaration of principles is manly and frank. There is no equivocation or evasion. He does not essay to sidestep the fact that the only issue in the United States is to win the war and to win it at the earliest possible moment. While he is a Republican, Mr. Lamb is unalterably committed to support Woodrow Wilson, our commander in chief, and opposed to any trimming or shading of principles which can only succeed in prolonging the war and in subjecting the nation to a human loss that cannot be estimated short of thousands or tens of thousands. Every day that hostilities are prolonged implies a continuation of this appalling price we are paying for the cause of freedom and every voice that is raised in criticism of the administration is another agency created to help the kaiser and retard the progress of civilization.

This is no time for either pacifist or peace at any price men. The United States has too much at stake. This nation is hearing further falling off will occur and suffer noticeably. the burden of the world's agony and we are going through a Gethsemane that demands the earnest and most sympathetic support of the administration.

Walter C. Lamb is a Nevada boy and one who has taken the deepest personal interest in the welfare of this state. He has had his experience in polities both here and in Washington and therefore is no apprentice hand to trust with guiding our destines in the capitol. As a man of standing and influence at home he has always been eagerly receptive when prospectors sought his support in development of the mineral resources of Nevada and many a man owes his first grubstake to the enthusiasm and energy of Walter C. Lamb. As owner of the leading technical paper of the padoing of the hospital ship Limit state, Mr. Lamb has been in a position where he commands the confidence of eastern investors and it was largely through his mined. Koelnische Seeltung says is activity that many properties of southern Nevada were successfully learns that the ship was in the barpromoted.

Nevada has suffered grievously from the pro-German utterances of our present congressional representative until every good of his deed. Koelnische Volks Seeicitizen hung his head in shame at such perfidy emanating from a tung thinks it superfluous to repro state that excels all others in patriotism, the state that leads in duce details of the commander's conthe number of voluntary enlistments before and after the draft duct as published in England, but law was enacted and the state that has gone over the top on every Liberty loan, Red Cross and other war activities. It is time to wipe out the stain and the only way to expunge the ineffable disgrace is GOVERNMENT RUNS TOWN to do so by sending a 100 per cent partiet to the halls of congress Such a person is Walter Lamb.

ENGLAND'S OPEN DOOR

THE British nation is doing all within its power to allay dis- ment of the streets and sidewalks I trust and to offset the seeds of dissension sown by insidious enemies to create a gulf between that nation and those who are banks and Seward. The cost of the rallying to the one banner of freedom. In England the wounded work will be paid from a federal Americans are received with enthusiasm and a work is being lots. Wasilla is in the center of an achieved which no amount of treaties or diplomacy could ever agriculture region and is a trading States government is building from accomplish. To make the name "Motherland" something more than point for the Willow Creek district, a name to these brothers in arms the Rotary club of Liverpool took in hand the organization of a scheme commenced by one of its members to provide British homes for American soldiers. Over 250 I repair your own. I am the finest to work on the railroad. suitable homes in country districts, outside Liverpool have been offered and for two months about twenty men per week have been thus entertained as honored guests. This number will be increased to fifty or sixty per week and the homes are waiting for them. There are twenty-one Rotary clubs in the British isles and each one is pledged to organize this work in its own district; by these efforts 20,000 homes will be offering a welcome to American soldiers. The experiences of the scheme in Liverpool are wholly delightful, besides which, it is a matter of national importance that the relations between all allies be cemented with all the means in the power of the several nations involved.

At a conference held by Lord Derby at the law office the president of the Liverpool club was invited to explain this project which received unqualified praise from the representatives of the United States army as well as from Lord Derby and the British members were invited to the conference. By taking the Americans into the homes of the people it is hoped to allay the anxiety which Americans parents are experiencing as they contemplate the temptations which beset their sons, who, many thousand miles from home, would otherwise have to take a friendless leave in a great city. When it is considered what the feelings would be, were the positions reversed, Great Britain, as a nation is entering into the proposal with sympathetic zest.

WAR COSTS FIFTY CENTS A DAY

THE United States is spending \$50,000,000 a day on the war. The government has just closed its account for the fiscal year revealed that the expenditure up to date, since July 1, 1917, has been twelve billion, six hundred million dollars. At first thought that seems an appalling sum. It is extremely large when one remembers that in peace times it took one billion to pay the government expenses for one year. But, as a matter of fact, since our

population is estimated at over a hundred millions we are now paying less than 50 cents a day apiece in return for which the nation has a great army in the field, a great navy on the seas, is fully protected from the Huns and is helping to win the war-Fifty cents a day is cheap-a very small amount to pay for the mighty forces that it is financing, and the great cause for which those forces are battling. When it comes to the fundamentals, 50 cents or \$5 a day would be a small price to pay and particularly when those who have taken up arms are paying in blood their tithe to the god of war.

PENALIZING BACHELORS.

S ENATOR Reed has urged taking bachelors above thirty-five before summoning the married men who have been drafted. No doubt the senator's proposal has certain military and social advantages that will not appeal to the bachelors themselves. The type of man that has remained free from the responsibilities of home and family out of pure selfishness, as is true of some bachelors, will be the sort to find inducements in Senator Reed's proposal for hiding behind a woman's skirt. It takes all kinds of people to make up world, but it would be more satisfactory if Cupid could discover lan politicians have been shot in the some way of discriminating against the yellowbacks who regard marriage only as a lesser evil to going to war. There is every reason why the bachelor should be penalized since he shirks the first duty of citizenship by failing to help the nation in bearing the burdens of war and in propagating families which are the main stay of the republic. He is a failure as a homebuilder and often ranks as a tax dodger in helping his country defray expenses by keeping his carnings in non-taxable securities and having no tangible holdings that the assessor can lay his hands on while enumerating the list of taxable property
